

LiveU Studio V1.19 Release Notes

Release Notes

Versions

- LiveU Studio V19.20
- Associated LiveU Central Version: 10.2.0

Summary

LiveU Studio V1.19 is a minor release with improvements and bug fixes.

Improvements

- Configure DNS for RTMP / SRT to studio.liveu.tv
- Remove delay feature and warning for LRT inputs
- Add a warning message for live source inputs with no audio
- Add a new LUC user type to blocked users list
- Add multiview as an option to support new packages
- Change wording on clip upload to Twitch menu

Bug Fixes

- Fix: Audio meter is not displayed for all ongoing events
- Fix: Easy share RTMP urls are displayed with the old DNS
- Fix: Remote guests are disconnected when going from testing to publishing phase
- Fix: Switching from a streaming unit to another will result in multiple error messages
- Fix: Refresh button from the Units panel does not work
- Fix: Refreshing Studio will result in all Units disappearing from the Unit Panel
- Fix: Stopping a unit that is streaming in Studio will result in the audio warning message being displayed
- Channel status remains stuck if you remove it from inputs and then immediately add another

Known Limitations

None
